

摆动式丝杆升降机

Swinging guide screw jack

1 概述 >>>>> Brief

目前国内的丝杆升降机只能实现单一的直线传动，丝杆的端部不能有径向位移，对安装要求较高，适用范围较窄。而最新产品**摆动式丝杆升降机**是允许丝杆端部有一定的径向位移，自动调节直线传动方向，能有效地避开来自垂直于升降机方向的附加载荷，延长丝杆升降机的使用寿命。目前已开发的规格为20KN，其它规格正在开发，用户可来电、传真咨询。

At present , internal screw jacks only transmit the movement along straight line , top end of screw can't move radially,demand high quality installation and can't used widely.the latest product—swinging screw jack has more virtues such as: screw top can bear some radial displacement ,adjust line drive direction automatically,can avoid the added load in the direction apeak to jack, pro—long screw jack service life.20KN type has been made and other type are making,users can inquire us by call and fax.
